Switzerland

January 2016

To whom it may concern,

This letter confirms that Longest Chance is an IATA Strategic Partner in the area of Baggage Services. In addition to the strategic partner status of the company, IATA and Longest Chance have worked together on the development of the Hand to Hand RFID Baggage Tracking System, which meets the requirements of IATA Resolution 753 when installed in appropriate airport locations.

In September-October 2015, during implementation of the pilot project in cooperation with Longest Chance in the airports of Sheremetyevo, Prague, Bologna, and Tallinn on the Aeroflot flights, the system demonstrated very high level of bag tag readability of 99.99%. This rate exceeded the expectations set for RFID tracking systems by the IATA Baggage Working Group.

Best regards,

Andrew Price
